\*The papers in this volume were presented at the 1980-1981 meetings of the Section of Science and Public Policy of The New York Academy of Sciences.

The New York Academy of Sciences believes that it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the authors of the papers that make up this *Annal* are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
